## military service

Military service is one of the highest callings a person can answer. Through years of training and real world experience both stateside and abroad military service forges leaders dedicated to peak performance, success and acting with integrity at all times. It is these same qualities which are difficult to obtain and highly sought after in the private sector.

At U.S. Water Services we both recognize and seek out these skills in candidates we pursue for employment. Our mission, vision and values statements speak to our commitment to excellence and can be found here ([link to site](#)). As a result, US Water Services is proud to have a significant portion of our employee population as veterans from all branches of service, both those who have served and those who continue to serve in various capacities in the Guard and Reserves.

## OUR VISION

To be the innovative provider of total water and energy solutions.

## OUR MISSION

US Water Services will be universally recognized as the most innovative and flexible provider in the market place by focusing on safe, economical and environmentally sound solutions. Our employees will provide the most cost effective integrated solutions comprised of engineering, equipment, chemistry and service to improve customer operations. We are committed to providing our employees with opportunities for learning and personal growth. Creativity and innovation are encouraged for improving effectiveness of our solutions. Employees will be provided the same respect and responsiveness within the organization which they are expected to share with customers.

### customer focus

We shall be committed to put the best interests of our customers first and take great care of the trust that our customers put in us.

### employee fulfillment

We are committed to develop and maintain US Water Services as a great place to work for the fulfillment of our employees. We will encourage and enhance the personal development of each employee. Our people will be best the water industry can offer.

### profitable

We will get paid fairly for the value we provide to our customers.

### safe

Safety shall be our first priority as demonstrated by our intentions and actions.

### cost effective

We will provide a significant return on investment for our customers.

### integrity

We will be open, honest and fair with our customers and our employees. We will do what we say and we will do.

### innovative

We will have innovative technical solutions to customer problems.

### leadership

We will provide leadership in the water treatment industry and everyday in each employee's job. We will do the "right" thing as guided by our principles. We will not "turn our heads", but rather meet challenges and obstacles and overcome them.

## about us water services

Solar Powered Boiler  
Case Study: e-solar

Headquartered in St. Michael, Minnesota and founded in 1996, US Water Services is the fastest growing private water treatment company in the country; and one of the largest independently owned companies in the upper-Midwest. Our company conducts business nationally and internationally and is supported by some of the most respected companies in the water treatment industry.

Comprised of three separate divisions: chemical, equipment and engineering and Ethanol Process Technologies, US Water Services is more dedicated than ever to customer satisfaction providing a complete integrated approach to water management.

From plant design throughout start-up and ongoing support, US Water Services provides a variety of services. We can complete chemical water management programs, analytical testing and service, engineering capabilities, as well as custom and standard line capital equipment builds in our St. Michael production facility and equipment maintenance and service with our on staff computer programmers, electricians and field service technicians.
